

**We make it easy to design
for greater energy savings.**

NEW CONSTRUCTION ENERGY EFFICIENCY

Commercial, Industrial and Public Sector

The ComEd[®] Energy Efficiency Program new construction offering provides solutions that can help your facility generate long-term energy and cost savings. The earlier in design you enroll your project (at concept development or schematic design phase), the better results you'll realize.

THE BASICS

Private and public sector facilities are eligible for the new construction offering. Receive incentives for new construction or major renovation of an existing space designed to exceed energy code requirements.

BENEFITS

You'll save energy and lower operating costs by implementing recommended measures.

- » Consult with experienced technical experts at no cost
- » One-time financial incentives to offset project costs for beyond-code systems and equipment
- » The more you reduce your energy use, the larger your financial incentive
- » Additional funds for lead design firms that actively engage with the program
- » Tailored incentives for achieving energy efficiency best practices for certain markets:
 - Multi-Family and Assisted Living
 - Warehouse and Industrial
 - Retail and Grocery
 - Office

Our technical experts offer simple, proven solutions and incentives to put your project at the leading edge of energy efficiency.

BEST PRACTICES FOR ENERGY EFFICIENCY

Illinois Energy Conservation Code sets minimum requirements for energy efficiency. But we have helped hundreds of projects achieve greater value by going further with their design. Reduce energy use, lower energy costs and make your building more comfortable, healthy, resilient and easier to maintain.

WHOLE-BUILDING APPROACH

We provide recommendations, analysis, assistance and financial incentives for energy-saving improvements to all major building systems — envelope, HVAC equipment, lighting, commercial refrigeration, and more. Working in conjunction with the gas utilities, the program offers a holistic approach to assisting your project.

CONTACT US

The ComEd® Energy Efficiency Program new construction offering provides incentives, technical services and whole-building solutions to help facilities use energy more efficiently. For more information, visit [ComEd.com/NewConstruction](https://www.comed.com/NewConstruction), email BusinessEE@ComEd.com or PublicSectorEE@ComEd.com, or call **855-433-2700** and ask to speak with a new construction representative.
